PROFESSIONAL SUMMARY

Software Developer with 2 years of experience in designing and developing scalable applications. Proficient in Salesforce, Django, and Jenkins, with hands-on experience in data migration from on-premises systems to Google Cloud Platform (GCP). Strong problem-solving skills with a focus on delivering efficient and reliable solutions.

TECHNICAL SKILLS

Programming Languages:	C, Python, Java, JavaScript
Frameworks:	React.js, Django
Libraries:	NumPy, Pandas, Matplotlib
Tools / Platforms:	Git, Bitbucket, SonarQube, Jupyter Notebook, Visual Studio Code
Databases:	PostgreSQL, MySQL, MongoDB
DevOps:	CI/CD Pipelines, AWS (ECS, EC2), Docker, Kubernetes, Linux
Cloud / CRM:	Salesforce Administration
AI/ML:	Retrieval-Augmented Generation (RAG), Machine Learning, Data Analysis
HPC / Parallel Computing:	Slurm

PROFESSIONAL EXPERIENCE

Associate Software Developer | Aner Info Technologies2024 – Present

- Developed and maintained web applications using React.js, .NET, and SQL, improving application performance by 25% and supporting scalable user growth.
- Optimized database queries and managed data operations using SQL Server, reducing query execution time by 30% and enhancing overall system efficiency.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot issues, and deploy feature updates, reducing production issues by 20%.
- Led a cloud migration initiative for a client, successfully migrating 100+ GB of enterprise data from on-premises infrastructure to Google Cloud Platform (GCP) with zero data loss.
- Automated migration workflows using Jenkins pipelines integrated with SQL and PowerShell, reducing manual effort by 60% and achieving near zero-downtime deployment.

Salesforce Administrator | Aner Info TechnologiesAug 2024 – Sep 2025

- Designed and implemented custom objects, workflows, validation rules, and process automations, improving business process efficiency by 30%.
- Managed data import/export, data cleanup, and deduplication using Data Loader and reports, enhancing data accuracy by 25%.
- Built dynamic dashboards and detailed reports, enabling stakeholders to make data-driven decisions and reducing reporting time by 40%.
- Supported integration of Salesforce with third-party applications, streamlining workflows and improving system interoperability.
- Managed roles, profiles, sharing rules, and field-level security, ensuring data confidentiality and compliance with organizational standards.

Software Engineer Intern | Research Center Imarat (RCI), DRDOMar 2023 – Aug 2023

- Implemented algorithms for intersection points, vertex ordering, and Ray Casting techniques for convex polygons, improving computational accuracy.
- Gained hands-on experience in testing and debugging, enhancing code quality and reducing errors in algorithm implementation.

EDUCATION

B.E - Computer Science Engineering Matrusri Engineering College - CGPA: 8.78	2020 - 2024
INTERMEDIATE Sri Chaitanya Junior College - 97.8%	2018 - 2020
SSC Dr. KKR Gowtham School - GPA: 9.7	2017 - 2018

PROJECTS

Conejocoin - Inventory Management System - Developed a full-stack web application using Django, React.js, and MySQL to manage coin inventory efficiently. - Designed modules for adding and managing coins, including barcode scanning (NGC) for quick data entry and tracking. - Implemented location management to organize and store coins based on specific storage locations. - Integrated eBay listing functionality, enabling users to directly list inventory items on the eBay platform. - Built reporting dashboards to track inventory metrics such as items sold, in-store stock, and sales trends, improving decision-making.
Salesforce Data Migration and Workflow Automation - Oxford - Executed large-scale data migration from SQL Server (SSMS) and PostgreSQL into Salesforce using Data Loader, ensuring high data accuracy and consistency. - Migrated business-critical datasets including companies, HR records, candidate profiles, job applications, and candidate resumes, handling 50,000+ records efficiently. - Performed data cleansing, transformation, and deduplication prior to migration, improving data quality by 25%. - Designed and configured custom objects, validation rules, and workflows to align migrated data with business processes. - Automated data validation and post-migration checks, reducing manual verification effort by 40%. - Built reports and dashboards to monitor migrated data and provide actionable insights for recruitment and HR operations.
Data Migration Automation using Jenkins - Blackline - Designed and implemented automated data migration pipelines using Jenkins to transfer large-scale data from on-premises systems to Google Cloud Platform (GCP). - Migrated multiple file types (CSV, JSON, XML, and database dumps) with high data volumes, ensuring data integrity and consistency. - Integrated Jenkins pipelines with SQL and scripting to automate validation, transformation, and loading processes. - Reduced manual intervention by 60% and improved migration efficiency while ensuring minimal downtime. - Implemented logging and error-handling mechanisms to track migration status and quickly resolve failures.
